

GENERAL WASHING INSTRUCTIONS TO ATEX WORKWEAR

By following these instructions, you longer your clothes' mileage and at the same time your clothing's qualities stick to the standards longer. Falsely maintained clothes can lose their protection- and visibility qualities.

- Leave the washing machine a bit incomplete (filled to 60-80 %). This is how the clothes wrinkle less and the friction caused harm are at minimum, and the clothes get cleaner.
- Close the zippers, buttons and Velcro, when washing
- All clothes, that have EN-label and/or reflectors, must be turned upside down when washing and be washed separately from other laundry
- Clothes that have EN-label and/or reflectors cannot be dissolved in any solvent, because the solvent can deteriorate / destroy the clothing's qualities, the reflector's surface can get broken / lose its reflecting quality in the washing after the solvent.
- In every ATEX workwear the maximum washing temperature is 60 °C. The recommended temperature is 40 °C.
- When washing the clothes, you should use regular washing detergent. Using soap may leave the clothing some coating that will affect the clothing's qualities.
- When washing, do not use fabric softener.
- Pants are recommended to be washed without suspenders. The elastics in the suspenders may shrink in the wash. The suspenders will return to their regular length when stretched. Products that have spandex are not supposed to be handled with fabric softener. The softener may harden the spandex.

TUMBLE DRYER

- Clothes that have EN-label and/or reflectors, are recommended not to dry in tumble dryer. Take a good look at the washing labels in the clothing, about the fabric and reflectors, before tumble drying.
- Take the clothes out of the tumble dryer while they're still a bit moist.
- Over drying may shrink the clothing, and weaken its qualities, as well as protectives and visibility.
- When ironing the reflectors, do not use steam.
- The manufacturer of the clothing, fabric, zipper, thread or reflector, does not refund for a falsely washed product.
